

Machine Learning – MCQs (Teacher Answers)

1. What does neuroscience study? (Answer: A)
 - A. The brain
 - B. Computers
 - C. Animals
 - D. Robots
2. What type of cell sends signals in the brain? (Answer: C)
 - A. Muscle cell
 - B. Blood cell
 - C. Neuron
 - D. Skin cell
3. How do neurons communicate? (Answer: B)
 - A. Chemicals only
 - B. Spikes (0 and 1)
 - C. Sound
 - D. Light
4. What makes decisions harder in the examples? (Answer: D)
 - A. Speed
 - B. Distance
 - C. Light
 - D. Noise
5. What is a perceptron? (Answer: B)
 - A. A brain cell
 - B. A computer game
 - C. A mathematical neuron
 - D. A robot

6. What do many nodes together form? (Answer: A)

- A. An artificial neural network
- B. A brain
- C. An algorithm
- D. A spreadsheet

7. What is machine learning? (Answer: B)

- A. Programming rules
- B. Teaching machines to learn
- C. Using calculators
- D. Storing data
